Behavior Genetics, Vol. 22, No. 6, 1992

Subject Index to Volume 22

All page numbers refer to the first page of an article or abstract. Page numbers followed by an "a" refer to a published abstract from the Behavior Genetics Association Meeting in Boulder, Colorado, July 1992.

Absence epilepsy, Mendelian cross, rats, 361
Active avoidance
  anxiety, rats, 718a
  mice, 177, 718a, 726a
  rats, 712a
Activity, mice, 721a, 725a, 751a, 754a
ADHD, Attention deficit hyperactivity disorder
  dyslexia, 723a
  rat model, 415
  twins, 337
Adoption studies
  Child Behavior Checklist (CBC), 710a, 748a
  communication development, 728a
  cross-fostering, 515
  environmental measures, 736a
  intelligence, 757a
  interests, 717a
  MMPI, 515, 761a
  SES and IQ, twins, 731a
  social competence, 740a
  successful aging, 735a
  temperament, 711a
Age dependent gene expression, C. elegans, 720a
Aggression, mice, 727a, 750a, 761a
Aging
  genetic analysis, C. elegans, 732a
  mice, 753a
  twins, 708a, 759a
Alarm odors, mice, 754a
Alcohol
  consumption, twins, 746a
  ethnic differences, 728a
  familial transmission, 63
  personality, twins, 752a
  representativeness of twins, 749a
  RI strains, mice, 635
  substance abuse, twins, 736a
  use and abuse, twins, 746a
Amphetamine and aggression, mice, 761a
Antisocial personality, family study, 761a
apterous gene, D. melanogaster, mating behavior, 469
Assortative mating, alcohol use, familial transmission, 63
Audiogenic seizures, RI strains, mice, 685
Automated measures, RI strains, mice, 729a
Behavior Genetics Association
  abstracts of 1992 Annual Meeting, 707
  referees for Volume 22, 765
  Secretary's report from 1992 Annual Meeting, 703
Benzodiazepine receptor, RI strains, mice, 735a
Blood pressure, twins, 758a
Brain proteins, RI strains, mice, 710a
CBC, see Child Behavior Checklist
C. elegans
  age dependent gene expression, 720a
  genetic analysis of aging, 732a
  lifespan mapping, 712a
  longevity markers, 719a
Censored data, simulated twin data, 265
Chickens, diallel cross, neurochemicals, 381
Child Behavior Checklist, CBC, 720a
  adoption study, 710a, 748a
  item response, 293

twins, age 2-4 years, 751a
Chorionic effects, dermatoglyphics, twins, 747a
Cigarette withdrawal, 730a, 732a
Circadian rhythms, rats, 742a
Coat color
ethanol, rats, 741a
gerbils, 125
Cocaine, mice, 738a
Cognition
attitudes, twins, 743a
development of specific cognitive abilities, 714a
development of general intelligence, 1–9 yrs., 715a
differential heritability, 135, 153, 755a
family study, 739a
human developmental behavior genetics, 225, 229, 239
infant measures, twins, 762a
intelligence, adoption study, 757a
Developmental environmental effects, 737a
California Personality Inventory, twins, 139a
Communication development, adoption study, 728a
Conservatism, twins, 755a
Coping strategies, mice, 752a
CPI, see California Personality Inventory.
Cross fostering, adoption study, 515
Cryopreservation effects, mice
Depression, twins, 740a, 754a
Diallel cross
active avoidance, mice, 718a
neurochemicals, chickens, 381
Differential heritability, cognition, 153, 755a
Divorce, twins, 756a
Drosophila
apterous gene, D. melanogaster, mating behavior, 469
cocaine, amphetamine, D. melanogaster, 748a
D. melanogaster, 453, 469, 557, 748a
D. paulistorum, mating behavior, 545
D. pseudoobscura, yellow mutant, 747a
geotaxis, chromosome analysis, 453
selection experiment, licking behavior, 113
Drug abuse, simulated data, human developmental behavior genetics, 193, 197
Drug use, twins, 756a
Dyslexia
ADHD, 723a
cognitive components, 722a
segregation analysis, 722a
twins, 741a
Evolutionary adaptation and stress, 743a
Epilepsy, linkage analysis, 2a
EPQ, see Eysenck Personality Questionnaire
Environmental measures, adoption study, twins, 736a
Ethanol
behavioral dimensions, mice, 755a
birth effects, rats, 723a
coat color, rats, 741a
congenic strains, mice, 757a
dependence, selection study, mice, 345
GABA, 729a
interaction with nicotine, mice, 714a
QTL analysis, RI strains, mice, 728a, 762a
repeatability of effects, mice, 734a
social effects, mice, 753a
stress, mice, 737a
taste predictors, rats, 742a
teratogenesis, mice, 723a
tolerance, mice, 716a
withdrawal, mice, 709a
Y maze, cholinergic systems, mice, 717a
Ethnic differences, alcohol use, 728a
Environmental measures, adoption study, 736a
Eysenck Personality Questionnaire, EPQ, 44a
Familial transmission, alcohol use, 63
Family size and sex ratio, 531
Family studies
antisocial personality, 761a
cognitive abilities, 739a
infant hand use, 163
Fetal sensory development, 713a
Handwriting, sex differences, 744
Fragile X, leukocyte cultures, 763a
Geotaxis, chromosome analysis, Drosophila, 453
Growth curves, simulated data, human developmental behavior genetics, 247, 253
Gustatory sensitivity, RI strains, mice, 655
Handedness, mice, 709a
Hippocampus, mice, 743a
Human Developmental Behavior Genetics, 191

cognitive ability, 225, 229, 239
simulated data, 193, 197, 215, 247, 253
Infant cognition measures, twins, 762a
Infant hand use, family study, 163
Inhibition, twins, 748a
IQ
development of specific cognitive abilities, 714a
development of general intelligence, 1-9 yrs., 715a

dependence, selection study, 345
GABA, 729a
interaction with nicotine, 714a
QTL analysis, RI strains, 728a, 762a

repeatability of effects, 734a
social effects, 753a
stress, 737a
teretogenesis, 723a
tolerance, 716a
withdrawal, 709a
Y maze, cholinergic systems, 24a
growth curve analysis, smoking habit, 121a
gustatory sensitivity, RI strains, 655
handedness,
learning and memory, hippocampus, 743a
male aggression, 727a
memory and learning, hippocampus, 743a
morphine effects, 720a
nicotine, RI strains, 734a
nitrous oxide withdrawal, 708a
odortypes, 763a
open field, Y chromosome, 750a
paw preference, selective breeding, 435
quinky gene, 739a
RI strains, 615, 621, 635, 655, 665, 677, 685
alcoholism, 635
audiogenic seizures, 685
automated measures, various, 729a
benzodiazapine, receptor, 735a
brain proteins, 710a
ethanol, QTL analysis, 728a, 762a
gustatory sensitivity, 655
nicotine, 734a
nitrous oxide withdrawal, 708a
saccharin intake, 81
spatial learning, 758a
saccharin intake, RI strains, 81
spatial learning
corticosterone, 737a
RI strains, 758a
water escape, cerebella, mutation, 724a
MMPI, adoption study, 515, 761a
Mongolian gerbils
behavior, 125
coat color, 125
Morphine effects, mice, 720a
Multiple regression analysis and model fitting, 489
MPQ, item response, twins, 135
mRNA proteins, rats, 403
Mx computer program, 740a
Neurochemicals, diallel cross, chickens, 381
Nicotine, RI strains, mice, 734a
Nitrous oxide withdrawal, RI strains, mice, 708a
Obesity, cohort effects, 746a
Obsessive-compulsive disorder, segregation analysis, 713a
Odortypes, mice, 763a
Open field, Y chromosome, 750a
Parental behavior, twins, 744a
Parental ratings, CBC, twins, 293
Pattern scalability, item response, twins, 135
Parenting behavior, twins, 750a
Paw preference, selective breeding, mice, 435
Pedigree analysis, simulated data, human developmental behavior genetics, 215
Personality
aging, twins, 726a
alcohol use, twins, 752a
canonical correlations, 45a
CBC, 293
adoption study, 748a
age 2-4 years, twins, 751a
conservatism, age differences, twins, 755a
CPI, twins, 764a
depressive symptoms
life events, 740a
pedigree analysis, 754a
disorder, twins, 727a
genetic structure, EPQ, TPQ, 725a
interests, adoption study, 717a
measurement, twins, 758a
MMPI, adoption study, 515, 761a
MPQ, twins, 135
personality disorder, 727a
social competence, adoption study, 740a
seasonal mood, twins, 733a
stability and change, twins, 759a
temperament, adoption study, 711a
toddler temperament, linkage, 745a
type A behavior, twins, 499
Psychopathology
alcohol use and abuse, twin study, 746a
ADHD, twins, 337
antisocial personality, family study, 761a
drug use, twins, 756a
epilepsy, linkage analysis, 707a
fragile X, 763a
obsessive-compulsive disorder, segregation analysis, 713a

schizophrenia
susceptability, twins, 745a
symptom heterogeneity, 721a
twins, discordant for, 718a
substance abuse, ASP symptoms, family study, 715a
Quails
color preference, 575, 585
dust bathing activity, selection experiment, 601
Quinky gene, mice, 739a
QTL analysis
RI strains, mice, 728a
twins, 760a
Rats
absence epilepsy, Mendelian cross, 361
active avoidance, 712a
anxiety, 718a
ADHD model, 415
circadian rhythms, brain biochemistry, 742a
ethanol
birth effects, 723a
coat color, 741a
taste predictors, 742a
Maudsley strains, mRNA proteins, 403
postural deficits, cerebellum, 707a
Reading performance, twins, 760a
Recombinant inbred strains, see Mice
Religion, education, social attitudes, twins, 43
Representativeness of twins, alcohol use, 749a
RI strains, see Mice
Saccharin intake, RI strains, mice, 81
Schizophrenia, 718a, 721a, 745a
Scholastic achievement, twins, 745a
Seasonal mood, twins, 733a
Segregation analysis
dyslexia, 722a
language disorders, 731a
obsessive-compulsive disorder, 713a

Selection experiments
ethanol withdrawal, mice, 709a
inverse line difference, 1, 11, 15, 21, 25, 29, 35
licking behavior, Drosophila, 113
SES and IQ, twins, adoption study, 731a
Sex ratio and family size, 531
Simulated data, human developmental behavior genetics
censored data, twins, 265
drug abuse, 193, 197
pedigree analysis, 215
weight and height, growth curves, 247, 253
Smoking
dietary consumption, 730a
Social competence, adoption study, 740a
Spatial learning, RI strains, mice, 737a, 758a
Specific cognitive abilities, development, 714a
Staggerer mutant, C57, mice, 101
Strain study, active avoidance, mice, 177
Substance abuse, ASP symptoms, family study, 715a
Successful aging, adoption study, twins, 735a
Taste predictors, ethanol, rats, 734a
Temperament, adoption study, 711a
Tobit factor analysis, 265
Toddler temperament, linkage, 745a
TPQ, see Tridimensional Personality Questionnaire
Tridimensional Personality Questionnaire, 725a
Twins
ADHD, 337
aging, 708a
dental status, 759a
alcohol
and substance abuse, 736a
consumption, 749a
use and abuse, 746a
use and personality, 752a
blood pressure during exercise, 758a
canonical correlations, 725a
CBC, 720a
age 2-4 years, 751a
censored data, simulated data, 265
chorionic effects, dermatoglyphics, 747a
cigarette withdrawal, 732a
cognition
and attitudes, 743a
differential heritability, 153
infant measures, 762a
components of dyslexia, 741a
conservatism, age differences, 755a
continuity and change, 14-20 months, 711a
CPI, 764a
depressive symptoms
life events, 740a
pedigree analysis, 754a

discordant for schizophrenia, 718a
divorce, 756a
drug use, 756a
environmental measures, adoption study, 736a
genetic structure, EPQ, TPQ, 725a
infant cognition measures, 762a
inhibition, 748a
item response, pattern scalability, 135
marijuana effects, 733a
marital history, 727a
measurement of personality, 758a
memory and correlates, 721a
MPQ, item response, 135
newborn crying, 724a
parental behavior, 744a
parental ratings, CBC, 293
parenting behavior, 750a
personality, 752a
  and aging, 726a
  disorder, 727a
  measurement, 758a
  stability and change, 759a
  QTL analysis, 760a
  reading performance components, 760a
  religion, education, social attitudes, 43
  scholastic achievement, 745a
  seasonal mood, 733a
  SES and IQ, adoption study, 731a
  schizophrenia susceptibility, 745a
  simulated data, censored data, 265
  successful aging, adoption study, 735a
  type A behavior, 499
Type A behavior, twins, 499
Unsolved problems in behavior genetics, 751a
Water buffalo, Zebu cattle, species comparison, 739a
Water escape, mice, 724a
Y chromosome
  aggression, mice, 750a
  coping strategies, mice, 752a
Zebu cattle, water buffalo, species comparison, 739a
